

REBECCA NYACHIEO

Aspiring SOC Analyst

rebeccanyachio.dev@outlook.com • linkedin.com/in/rebeccanyachio • github.com/rebeccanyachio • rebeccanyachio.github.io

SUMMARY

Entry-level security practitioner building toward a SOC Analyst role through hands-on home lab work. Experienced with Windows Security event analysis, Splunk ingestion and querying, and MITRE ATT&CK mapping. Background in clinical data workflows (EPIC), programming (bash, Java, C++), and AWS. HackTheBox Apprentice rank. Brings a pattern-recognition and documentation discipline developed across healthcare and technical environments.

TECHNICAL SKILLS

SIEM / Logs: Splunk Enterprise, Windows Event Viewer, Universal Forwarder, Event IDs 4625/4624/4720/4672

Operating Systems: Windows 11, Linux (Ubuntu Server), macOS

Networking: TCP/IP, DHCP, DNS, RDP, Wireshark, Nmap

Programming: Bash, Python, Java, C++, SQL (MariaDB)

Frameworks: MITRE ATT&CK, Google Cybersecurity Certificate, Lean Six Sigma Yellow Belt

Tools: VirtualBox, AWS S3, EPIC, Git, Burp Suite

SECURITY PROJECTS

RDP Brute Force Detection Lab | Home Lab

2025–Present

- Simulated repeated RDP authentication failures from Kali Linux VM to Windows target; analyzed Event ID 4625 clusters in Windows Security logs and Splunk
- Discovered successful logon (Event ID 4624) from same source IP following failure cluster, escalating finding to likely credential compromise; mapped to MITRE T1110.001
- Configured Splunk Enterprise on Ubuntu Server with Universal Forwarder for centralized log collection and SPL-based querying

Account Creation & Privilege Monitoring | Home Lab

2025–Present

- Monitored new local account creation via Event ID 4720 and privileged logon activity via Event ID 4672 in Splunk
- Documented detection hypotheses, evidence, analysis, and recommended responses for each investigation; mapped to MITRE T1136.001 and T1078

CTF & Platform Labs | HackTheBox / picoCTF / OverTheWire

2024–Present

- HackTheBox Apprentice rank; completed defensive-focused labs emphasizing log analysis and system behavior
- Documented PCAP analysis, Base64 decoding, and web exploitation labs (Wireshark, Burp Suite)

EXPERIENCE

Programmer Intern | Carrot Health (now Unite Us) — St. Paul, MN

May–Sep 2020

- Engineered bash script to automate file transfer from AWS S3 to company SFTP server, reducing manual processing time
- Used Jsoup to scrape and parse web content for analytics pipeline; authored technical documentation and updated user management system

Nursing Assistant | Kettering Health Miamisburg — Dayton, OH

Feb 2021–Sep 2023

- Managed real-time EHR documentation in EPIC across high-volume inpatient unit; coordinated data handoffs between nursing staff, physicians, and interdepartmental teams

EDUCATION

Doctorate, Acupuncture & Chinese Herbal Medicine (In Progress) | Yo San University — Los Angeles, CA

Bachelor of Arts, English Literature | Bethel University — St. Paul, MN

Completed computer science coursework: programming, networking, operating systems

Associate of Science | Sinclair Community College — Dayton, OH

GPA 3.5 • Phi Theta Kappa Honor Society — Member and Secretary

CERTIFICATIONS & TRAINING

Google Cybersecurity Professional Certificate • Lean Six Sigma Yellow Belt • CompTIA Security+ (In Progress) • Mental Health First Aid
